

Adelaide Fibreglass pools

For a family pool that's made for a jet-setter, you've got to check out the Bourke 8M fibreglass pool. It's got angles and curves that make it a step above the Jones' pool and you don't have to drop a tonne on it.

The Bourke 8M is a large fibreglass pool but isn't so large that it can't fit in the average Australian backyard. The swimming pool is 8 metres in length and 4.6 metres in width. You've got safety ledges all around the pool for peace of mind. But for peace of heart you've also got a spa nook that you can add jets too.

To get the most out of your fibreglass swimming pool space, we've made the steps compact on one edge. Additionally the floor and stairs are slip resistant as an extra safety feature.

This fibreglass pool is 1.8 metres in depth on the deep end and 1.1 metres on the shallow end. In the middle you can swim freely and do your laps. This pool gives you the opportunity to level up if you want to.

The Bourke 8M offers curves and luxury and you can customise it to fit your lifestyle. It can be simple luxury or extravagant luxury, the choice is yours.
