

Adelaide Fibreglass *pools*

For a purely sleek design in fibreglass pools, you have to take the Collins 9M into consideration. It gives you a ton of swimming space at 9.3 metres long and 4.5 metres wide. You have steps and a swimout on opposite corners which makes it easy for everyone to get in and out of the pool when you're entertaining or just having a family day. In the center you can swim laps unobstructed as all of the steps and swim ins sit on the corners.

The deep end measures in at 1.95 metres and on the shallow end you've got just 1.22 metres of depth so everyone in the family can get the most out of this pool. You even have an extra access area from the deep end that allows you to directly enjoy the deep while others are busy on the shallow.

Additionally the steps are slip-resistant and the floor is slip-resistant too so you don't have to worry about slip and falls with this fibreglass swimming pool. Thanks to the sleek design, it's quite easy to prepare your backyard space for installation as you don't have to worry about any protrusions. This also makes your fibreglass pool costs minimal.
