

# Adelaide Fibreglass *pools*

This fibreglass plunge pool is perfect for lounging around during the summer months. At just 2.8 meters wide and 4.3 meters long, the Courtyard 4M is also great if you are looking for a small fibreglass pool. These days a lot of homes in big cities are being built on smaller blocks which means backyard spaces are also becoming less spacious. However, that shouldn't have to mean that you can't have a pool.

You'll also be happy to know that with this more compact size, your fibreglass pool cost decreases. You will end up paying almost half of what a full-size lap pool costs. Not only will the cost of the pool itself decrease, but so will the costs associated with preparation, installation and running costs.

Additionally, your fibreglass plunge pool is just 1.18 metres in depth on the shallow end and 1.55 metres on the deep end, making it easy for kids and adults to relax comfortably. If you've got a small space or just want a pool for relaxing and entertaining in, then the Collins 4M Fibreglass Pool is a great choice.
