

Adelaide Fibreglass pools

If you're looking for a fancy little addition to your backyard then the La Trobe 5M fibreglass pool should be right up your ally. It is 5.3 metres long and 2.5 metres which makes it perfect for relaxing, entertaining and even getting a few strokes.

This inground fibreglass pool has a bench running along one side of the pool which means you can be in the pool and sunbathe too. The bench runs along up to the stairs and swim in so you get smart utilisation of space. The opposite side of the pool is free and open without any encumbrances for swimming.

This fibreglass pool is a good choice if you've got a small backyard as it utilises minimal space. This also means your fibreglass pool costs are going to be lower than if you purchased a larger size pool. The cost of the pool is significantly lower than large fibreglass pools.

The deep end of this La Trobe fibreglass pool is 1.65 metres and the shallow end amounts to 1.13 metres. If you have any questions about whether or not this pool can fit into your space or what you need to do to prepare your backyard for a fibreglass pool, please give us a call and our swimming pool experts will guide you in the right direction.
